EXPERIENCE / INTERNSHIPS

- PHP Developer Internship | EUPHORIA GENX | Kolkata | JANUARY-JUNE(2023)
- MERN Stack Developer Internship | Kolkata | AUGUST-MARCH (2024-2025)

ACADEMIC PROJECTS

Restaurant Management System
Technologies: PHP, MySQL, HTML, CSS, JavaScript

- Developed a web-based restaurant management system using PHP and MySQL
- Implemented modules for menu management, order placement, billing.
- Designed a user-friendly admin panel to manage menu items, staff, and daily orders
- Integrated a basic authentication system for admin and staff login
- Applied CRUD operations for managing food categories, orders, and customer details

Blood Bank Management System
Technologies: MongoDB, Express.js, React.js, Node.js (MERN Stack)

- Built a full-stack web application to manage blood inventory, donors, and requests
- Created RESTful APIs using Node.js and Express for secure CRUD operations
- Designed a responsive frontend with React.js, including user-friendly dashboards
- Implemented donor registration, blood stock tracking, and request handling
- Used MongoDB for managing blood types, donor records, and hospital requests
- Integrated authentication and role-based access control for admin and hospital users

Swiggy Clone

Developed a fully responsive food delivery web app inspired by Swiggy using React.js, showcasing dynamic UI**.**
